

# Data Delivered. Guaranteed.

**Optimize inventory control with the TankScan® Data Delivered Guarantee.**

## **See accurate inventory readings in your future. Guaranteed.**

Only TankScan proactively monitors the status of your entire wireless tank monitoring system, guaranteeing uninterrupted visibility of your fluid inventory across all bulk sites.

- ✓ No risk of human error
- ✓ No manual records
- ✓ No surprises caused by dead batteries or failed connections
- ✓ Real-time, centralized access to reliable inventory and trending data
- ✓ Significant cost savings

## **Backed by our award-winning ATEK Service Platform.**

The M2M Evolution Business Impact Awards recognize a select group of companies and business leaders who have successfully leveraged M2M and the Internet of Things (IoT).

- ✓ Full operations monitoring, maintenance and support
- ✓ Proactive end-to-end system monitoring
- ✓ Uptime monitoring for optimal operations
- ✓ Communications monitoring ensures connectivity to the platform
- ✓ Timely and threshold-triggered reporting
- ✓ Dashboards identify any tank service issues
- ✓ Alerts when batteries are running low
- ✓ Dedicated customer care team representatives
- ✓ Continual supervision of TankScan hardware

# Data Delivered Guarantee Details

The Data Delivered Guarantee applies to validated stationary installations of TankScan TSM8000 and TCU tank level monitoring systems. ATEK Access Technologies guarantees that each system consisting of a gateway and its associated monitors will provide at least one level reading per day per monitor or ATEK will notify you of this situation by the next business day. ATEK technical support will help rectify the cause of the downtime to the extent that can be ascertained through the ATEK Intelligence Platform and ATEK Service Platform. In the event you do not receive notification by the next business day of this situation, ATEK, upon request, will apply a credit to your account, for the amount of \$10 per affected gateway per month, for a yearly maximum of \$120 per gateway, and apply the credit on the next billing of ATEK Intelligence Platform services. Customer notification may take the form of a manually or automatically generated email, text, or phone call. To be eligible for the Data Delivered Guarantee, a signed TankScan Installation Approval form must be on file for the tank monitor and gateway in question and monitors must be set to make at least two reports per day. Additionally, your ATEK Intelligence Platform services account must be current. ATEK is not liable for any loss of business income due to the loss of data. This guarantee does not imply nor offer an extension of the factory warranty period for the monitors or gateways. The Data Delivered Guarantee is in effect for the term of the ATEK Intelligence Platform services contract. Updates to and extensions of the ATEK Intelligence Platform service contract will, at ATEK's discretion, cause a re-examination of the Data Delivered Guarantee.

## TankScan Wireless Tank Level Monitor

### Tank Monitoring

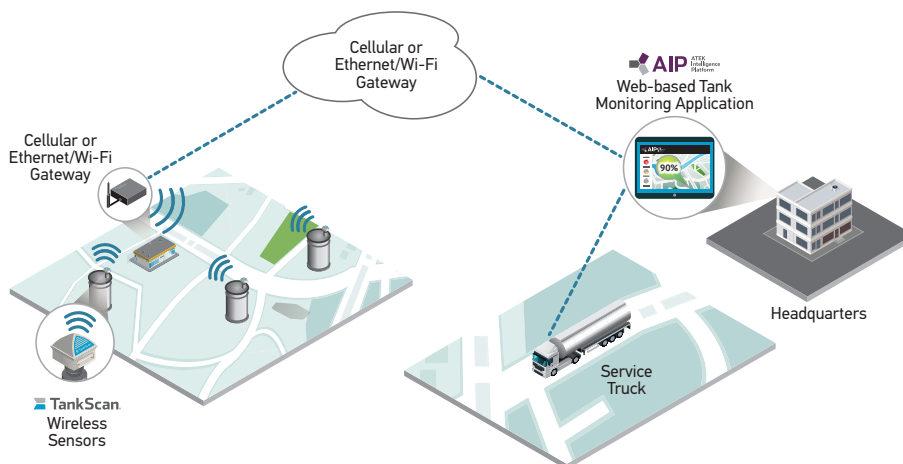

The TankScan solution gives you the tools to accurately monitor fluid levels in multiple tanks, across multiple sites, from one convenient location—your computer, tablet or smart phone. TankScan® wireless tank monitoring gives you real time access to the data you need to reduce your costs and improve the efficiency of your operations.

#### Turnkey Service

- Easy integration with your enterprise systems
- Full installation, maintenance and service plans
- Save with lease-to-own options

## How TankScan Works

1. Wireless sensor on tanks sends fluid measurement data to a central gateway.
2. Gateway sends data from all tanks to your computer or Internet device.
3. Web-based software displays fluid levels, usage and alarms.
4. Use data for improved inventory management and to save money on operational efficiencies
