

TankScan TSC Fuel Inventory System

Automatic Tank Gauge Connector

The power of data. **Optimized.**

The TankScan TSC Fuel Inventory System communicates with existing Automatic Tank Gauge (ATG) equipment placed for detecting fuel levels in under-ground storage tanks, utilizing industry-adopted serial communication protocols. The TSC connects easily to existing ATG systems using their built-in communication port.

The TSC Fuel Inventory System seamlessly integrates with the ATEK Intelligence Platform (AIP) providing fuel jobbers with a mobile-friendly dashboard where the ATG inventory data is presented, managed and stored. The web-based platform is accessible from any internet connected device.

TankScan TSC works with most ATG systems in the market today and is easily installed. Please contact us at CCT@TankScan.com so we can assist you to ensure ATG functionality and compatibility with the TankScan TSC.

Optimize your routes

Accurate tank data ensures just-in-time collections and deliveries.

Optimize your efficiencies

Reduce labor and transportation costs associated with manual tank measurement and reporting.

Optimize your service

Know when your customers' tanks need to be serviced before they do.

Optimize your growth

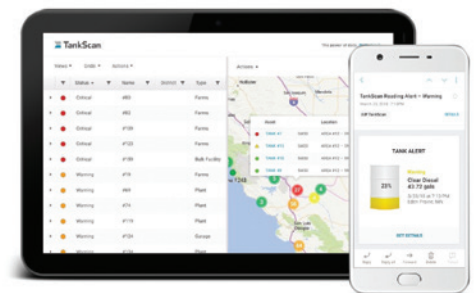

Add customers without having to add more trucks or drivers.

ATEK Intelligence Platform (AIP) Capabilities

Web-based software can be accessed from any Internet-connected computer.

- Scales from 1 to over 100,000 ASTs or USTs
- User-friendly dashboard displays accurate measurements across all tanks
- Users can view multiple tanks to simplify site monitoring
- Customizable email condition-based alerts provide notification when preset levels are reached
- Multiple users can be authorized to access various levels of data
- Analyze tank data with timely reports
